

THE JAPAN SOCIETY FOR HEAT TREATMENT (JSHT)

(社団法人 日本熱処理技術協会)

Established: 1960

Approved by the Ministry of Education as an incorporated association: Apr.1978

1. Purpose and Scope

JSHT is a representative society who is specialized in heat treatment of materials.

JSHT deals with researches, investigations and education programs on all kinds of heat treatment technologies from fundamental to advanced fields.

Collaborations with the heat treatment industries are also one of the most important activities. JSHT acts as a backbone to provide theoretical basis to the industries for their technology and makes consultations on practical production field program.

2. Main Activities

(1) Issue of the Journal of The Japan Society for Heat Treatment, "NETSU SHORI", bimonthly. The contents of the Journal include technical papers, reviews and lectures. Easy word for field technicians to understand advanced technology is the editorial policy. All members can contribute to the Journal.

(2) Publication of technical books concerning heat treatment. "Handbook for Heat Treatment" and "Guidebook for Heat Treatment" were revised and published in the years 2000 and 2001 respectively. "Metals Structure and its Properties" is being revised and will be published in fall, 2003.

(3) JSHT dispatches a delegation to international conferences or seminars held by IFHTSE(International Federation for Heat Treatment and Surface Engineering), and as one of the most active member of IFHTSE, JSHT promotes to have these conferences and seminars in Japan. International conference held in Kyoto in 1992, and the current Asian heat treatment conference in Matsue are such activities.

(4) JSHT holds the member meetings in spring and fall every year, where members can present the updated results on their researches and development. At each meeting, a best presentation award is given among the young scientists and engineers and the winner will be partially supported his/her travel expense to attend an upcoming international conference or seminar held by IFHTSE.

(5) JSHT promotes a various kinds of educational programs such as instructive seminars for beginners, advanced summer seminars with technical instructions and topical seminars held in various locations in Japan. Members can attend these seminars

with a reduced fee or free from the charge.

(6) JSHT also promotes organized research works. Members are informed about the projects currently running and can join them if they wish.

3. Annual Membership Fee

- (1) Regular Membership (resident in Japan)----- ¥ 8,000 (yen)
- (2) Student Membership(resident in Japan) -----¥ 3,000 (yen)
- (3) Collaborated Membership (company membership, resident in Japan)
 - 1 membership -----¥25,000(yen)
 - 2 and above -----¥20,000(yen)×memberships
- (4) Foreign Membership (non-resident in Japan)
 - ¥ 9,000(yen)(incl. Air mail fee)
